Vancouver, B.C. Canada – November 6, 2007

### Materials Testing and Recommencement of Exploration Program

Nass Valley Gateway Ltd. (the “Company”) is pleased to announce that materials testing on representative rock samples from the Nass Bay project in northern B.C. has commenced. One sample has been submitted to Metro Testing in Burnaby, B.C. and lab work has started. The second sample has been submitted to Dynamic Consultants in San Francisco, CA and lab work will be starting second week in November.

Further to the news release of September 10, 2007, the Company is pleased to announce the recommencement of its exploration program on the Kleanza property. A geophysical consulting firm has been contracted to complete an induced polarization ground survey over the Kleanza grid with work beginning the second week of November.

The Kleanza Mountain project is located just 12 kilometers southeast of Terrace, B.C. in the Bornite mountain area. The property is located near a known historic copper-silver prospect. The initial exploration program started in June 2007.

The Company also wishes to announce that presentations were conducted for the Nisga’a villages of Gingolx, Laxgalts’ap and Gitwinksihlkw, including the local Nisga’a Societies of Terrace and Prince Rupert in order to update the communities on the Company’s exploration status and objectives. The presentations in the village of New Aiyansh and the Nisga’a Society of Vancouver had to be postponed and will be held in the near future.
